

AFTAB FARHAN ARKO

Full Stack Developer

Email | LinkedIn | GitHub | Portfolio | WhatsApp | LeetCode

PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years of experience building scalable web applications using TypeScript, Next.js, and NestJS. Skilled in system design, API development, database architecture, authentication, and CI/CD, with experience leading developer teams and delivering reliable, production-ready solutions.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, AI Client Integration
- **Backend:** Node.js, Express.js, NestJS, REST APIs, Authentication (JWT/Passport), AI Integrations
- **Database:** PostgreSQL, MySQL, MongoDB, Firebase, Mongoose, Prisma
- **Tools & AI APIs:** Git, GitHub, GitLab, Postman, Docker, CI/CD, OpenAI API, Google Gemini API
- **Libraries:** Redux Toolkit, RTK Query, Framer Motion, GSAP, Socket.IO

EDUCATION

Diploma in Computer Science and Technology - CST
Rangpur Ideal Institute of Technology (RIIT) Polytechnic

2022 - 2026

EXPERIENCE

Mar 2026 – Aug 2026

Team Lead & Full Stack Developer — JEVXO Software Company

Live

- Led full-stack development across 10+ client projects, driving architecture, technical decisions, API development, and end-to-end delivery while ensuring client satisfaction.
- Led and mentored a development team of 22+ developers/interns through code reviews, technical guidance, and project planning while maintaining code quality and delivery standards.

SELECTED PROJECTS

1. Rajshiba — Digital Home Service Platform

Live | Backend | Frontend

Tech Stack: Next.js 16 • TypeScript • NestJS • Node.js • PostgreSQL • TypeORM • Redux Toolkit (RTK Query) • WebSockets • Shadcn UI • JWT Auth • Swagger API • Docker • Google Gemini API

- **Performance Optimization:** Reduced initial page loading time by 35% and optimized API response times to under 200ms by implementing efficient database indexing and code splitting.
- **Unified Multi-Role Communication:** Engineered a seamless messaging system connecting agents, clients, and vendors directly through their respective dashboards.
- **AI-Powered Chatbot & Automated Booking:** Integrated an intelligent AI assistant to instantly resolve customer queries, recommend appropriate services, and seamlessly automate the service booking workflow directly within the chat interface.

2. Comprehensive Course Selling & Affiliate Platform

Live | Backend | Frontend

Tech Stack: Next.js, React, TypeScript, Node.js, NestJS/Express.js, PostgreSQL, SSLCommerz, REST API

- **Resolved Access Control & Data Privacy Issues:** Eliminated unauthorized data overlap by engineering a strict role-based architecture with dedicated, permission-controlled dashboards for Super Admins, Students, and Affiliates.
- **Performance, Security & User Experience:** Optimized HTTP/API response times to under 200ms, strengthened database security and data protection, and achieved 100% performance efficiency while delivering a fast, reliable, and seamless user experience.
