

AFTAB FARHAN ARKO

Full Stack Developer

Email | LinkedIn | GitHub | Portfolio | WhatsApp | LeetCode

PROFESSIONAL SUMMARY

Full-Stack Engineer with 2+ years of experience specializing in scalable system design, event-driven architectures, and high-concurrency applications using TypeScript, Next.js, and NestJS. Demonstrates a strong track record of orchestrating the end-to-end SDLC, translating complex business requirements into enterprise-grade platforms, and accelerating delivery through automated CI/CD deployment.

TECHNICAL SKILLS

- Frontend: React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS
- Backend: Node.js, Express.js, NestJS, REST API, JWT, Passport.js, CI / CD
- Database: PostgreSQL, MySQL, MongoDB, Firebase, Mongoose, Prisma
- Tools: Git, GitHub, GitLab, Postman, Docker
- Libraries: Redux Toolkit, RTK Query, Framer Motion, GSAP, Socket-IO

EXPERIENCE

Mar 2026 – Aug 2026

Development Team Lead & Full Stack Developer — JEVXO Software Company

Live

- Led full-stack development of scalable web applications, driving architecture, technical decisions, API development, and end-to-end project delivery while ensuring 100% client satisfaction.
- Led and mentored the development team through code reviews, technical guidance, and project planning while maintaining code quality and delivery standards.

SELECTED PROJECTS

1. Rajshiba — Digital Home Service Platform

Backend | Frontend | Live

Next.js 16 • TypeScript • NestJS • Node.js • PostgreSQL • TypeORM • Redux Toolkit (RTK Query) • WebSockets (Socket.io) • Material UI (MUI) • Shadcn UI • JWT Auth • Swagger API • Docker

- **Real-Time Geo-Tracking & Navigation:** Integrated Google Maps API with Socket.io to render live technician movement, dynamic route updates, and turn-by-turn field navigation with low latency.
- **Event-Driven Progress Stepper:** Engineered an event-driven status tracking workflow (Placed → On the Way → Job Started → Completed) triggering instant UI updates without manual page refreshes.
- **Bi-Directional In-App Communication:** Built a secure, real-time messaging and notification system leveraging WebSockets for seamless direct communication between customers and field technicians.

2. AI-Powered Multi-Tenant SaaS E-Commerce Console

Backend | Frontend | Live

Next.js • React 18 • TypeScript • Node.js • NestJS • PostgreSQL • Prisma ORM • Redux Toolkit • RTK Query • REST API • Socket.io • Passport.js • Docker

- **Multi-Tenant Architecture & RBAC:** Architected a scalable multi-tenant SaaS platform with role-based access control, secure route guards, and permission management for Admins and Merchants.
- **AI-Powered Sales & Real-Time Logistics:** Integrated AI-driven sales insights with Socket.io real-time updates and automated parcel booking through Steadfast, Pathao, and RedX courier APIs.
- **Fraud Prevention & Merchant Operations:** Built an algorithmic fraud checker to analyze buyer return history, reduce RTO losses, and support bulk CSV product imports and PDF invoicing.
